

ONE CLEAR VIEW

Integrated Governance, Risk and Compliance

Replace spreadsheets and siloed tools with a single source of truth, supported by continuous expert oversight to ensure risks are actively followed up, monitored and escalated.

Powered by a secure GRC platform and a dedicated GRC Service Desk providing independent oversight.

Integrates

GRC data across the organisation into one platform

Monitors

Risk, compliance, audits and incidents in real time

Oversees

Risks, controls and actions through continuous expert monitoring and escalation

Enables

Clear oversight and informed executive decisions

The GRCWatch advantage

- Continuous insight and expert oversight
- A single source of truth for leadership
- Aligned to strategy, not just compliance
- Scales as complexity grows
- South African expertise, global standards

Improve risk visibility and executive decision-making

Many organisations still manage governance, risk and compliance across fragmented tools and disconnected processes. This limits visibility, slows decisions and increases exposure without executive assurance that risks are being actively managed.

- Reactive risk management
- Growing regulatory pressure
- Increased board and stakeholder scrutiny

More than software

GRCWatch combines powerful GRC software with an embedded expert service layer, including configuration, advisory, monitoring and user support.

- GRC framework design and refinement
- Risk and compliance advisory
- System configuration and administration
- Continuous monitoring and reporting
- Training and user support

Modular GRC solutions

**Deploy what you need.
Scale as you grow.**

Governance

Oversight, Policies, Controls, ESG, Health and Safety

Risk Management

Enterprise Risk, Incident Risk, Cyber Risk, Insurance Risk

Compliance

Regulatory, JSE, PCI-DSS, Vendor Compliance

Assurance

Audit Management, Continuous Control Monitoring, SOX
